

IDENTIFICATION PLATES FOR SEWERS AND CABLE CASINGS

According to DIN 4068 D
DIN 40019 A1
DIN 40019 B1

In brief...

- They are made of a bicolour injection-moulded plate in ASA Thermoplast (Luran S), which can take extreme weather, temperatures and shocks.
- Thanks to their absolutely non-reflecting matt surface, they allow easy reading, even at a distance.
- They are firmly fastened by 4 countersunk stainless steel (V2a) screws in a firm, flat mount.
- They can be fitted either with SGM inserts or with all inserts currently produced by other manufacturers.

**Sewage version :
(according to DIN 4068)**

200 x 140 mm,
Signplate D, DIN 4068

200 x 140 mm,
(no DIN listing)

140 x 100 mm,
(no DIN listing)

**Cable casing version :
(according to DIN 40019)**

Please note :

All signplates and inserts
can be printed to your
own specifications (e.g.
in English).

Signplate B1 Signplate A1

Backing plates :

All identification plates can be used
with an optional backing plate.

The backing plate increases stability
and prevents unauthorized removal
of the inserts.

(see below)

The backing plate is countersunk in
the signplate and therefore invisible.
Signplate and backing plate together
constitute a tough, compact and
warp-free unit.

**Increased reliability :
camouflaged socket head**

SGM uses stainless steel (V2a)
hexagonal socket screws to hinder
unauthorized removal (nevertheless
other screws can be used).
Practical plastic caps can effectively
camouflage the screw heads.

**Further identification plate
equipment :**
(see separate leaflet)

Inserts :

- digits
- letters
- symbols
- special signs

Available in selections or as
complete sets in practical sorting
boxes.

Fastening elements :

- Aluminium fastening plates for
post or wall mounting
- Aluminium posts
- Aluminium fastening clamps for
fixing fastening plates to posts
- Screws, steel straps
