

IDENTIFICATION PLATES FOR WATER LINES

According to **DIN 4067 A**
DIN 4067 B
DIN 4067 C

In brief :

- They are made of a bicolour injection-moulded plate in ASA Thermoplast (Luran S), which can take extreme weather, temperatures and shocks.
- Thanks to their absolutely non-reflecting matt surface, they allow easy reading, even at a distance.
- They are firmly fastened by 4 countersunk stainless steel (V2a) screws in a firm, flat mount.
- They can be fitted either with SGM inserts or with all inserts currently produced by other manufacturers.

sgm

Variations :

For long distance water lines according to DIN 4067 A (200 x 140 mm) :

With optional empty spaces for a 10 mm high, 12-field insert at top centre.

For water lines according to DIN 4067 B (200 x 140 mm) :

With the option of 1, 2 or no empty spaces for a 10 mm high, 5-field insert at top right.

For house connections DIN 4067 C (140 x 100 mm) :

With or without empty spaces for a 10 mm high, 6-field insert at top right.

Please note : All signplates and inserts can be printed to your own specifications (e.g. in English). Multicolour printing also possible.

Backing plates for water lines identification plates :

All identification plates can be used with an optional backing plate.

The backing plate increases stability and prevents unauthorized removal of the inserts.

(see below)

The backing plate is countersunk in the signplate and therefore invisible. Signplate and backing plate together constitute a tough, compact and warp-free unit.

Increased reliability : camouflaged socket head

SGM uses stainless steel (V2a) hexagonal socket screws to hinder unauthorized removal (nevertheless other screws can be used). Practical plastic caps can effectively camouflage the screw heads.

Further identification plate equipment :

(see separate leaflet)

Inserts :

- digits
- letters
- symbols
- special signs

Available in selections or as complete sets in practical sorting boxes.

Fastening elements :

- Aluminium fastening plates for post or wall mounting
- Aluminium posts
- Aluminium fastening clamps for fixing fastening plates to posts
- Screws, steel straps
